

Communication

power at your fingertips.

ICON CMO+
systems

With IconCMO+ for the organization and IconCMO for its churches, you have the most powerful and affordable software solution available.

Provides quick and accurate email communication horizontally across peer tiers, downward to reporting tiers, and downward to churches. A single cohesive system means that email addresses and other staff information is always 100 percent current so your communication always gets where it's supposed to.

IconCMO+ allows for the definition of an unlimited number of staff positions for the entire organization. Each staff position contains important communication information such as email address, phone numbers (land lines, faxes, and cell phones) and mailing addresses. This gives church leaders the power to communicate quickly; regardless of the medium used.

Work from anywhere. Because IconCMO+ is web-based, it can be used anywhere there's an Internet connection - providing increased flexibility and time savings. And you can be sure your information is safe because IconCMO+ automatically backs up your data and secures it as it travels over the Internet using standard TLS encryption.

With seamless, electronic communication you can share information much faster than standard mail and without the expense of creating letters, stamp costs, and other preparatory items.

IconCMO+; Instant, Accurate, and Secure... The Ultimate Management Solution for Your Organization and its churches.
