information at your fingertips.

With IconCMO+ for the organization and IconCMO for its churches, you have the most powerful and affordable software solution available.

Now, with IconCMO+, church leaders have the ability to obtain important information that is available at any time and always 100% current at the time the report or graph is presented.

No more waiting months for quarterly or annual reports. Track up-to-the-minute donation levels at an individual church or the entire ministry with the click of a button.

IconCMO+ compiles easy-to-read graphs and charts that you design and choose, showing the information you require when making informed decisions about your organization.

Knowing the giving patterns of all the churches within the network will facilitate more informed decisions. However, sometimes a decision that is good for one church may not be good for another; with IconCMO+ you can enjoy the added flexibility of viewing giving patterns at the individual church level.

Work from anywhere. Because IconCMO+ is web-based, it can be used anywhere there's an Internet connection - providing increased flexibility and time savings. And you can be sure your information is safe because IconCMO+ automatically backs up your data and secures it as it travels over the Internet using the same 256-bit encryption that banks use.

IconCMO+; Instant, Accurate, and Secure... The Ultimate Management Solution for Your Organization and its churches.
