

With IconCMO+ for the organization and IconCMO for its churches, you have the most powerful and affordable software solution available.

IconCMO+ allows you to easily answer questions such as which churches are growing?, which ones are ageing? , and which ones are in trouble? And this information is available at the click of the mouse.

Monitor attendance levels at a single church or view trends by compiling the same information over the entire denomination.

View the number of births, deaths, weddings, baptisms or other demographic information by church, region, or the entire organization with ease. No need to wait for churches to submit this information; with IconCMO+ it is always available the moment a church updates the system. Timely, accurate and simple is what IconCMO+ is all about.

Work from anywhere. Because IconCMO+ is web-based, it can be used anywhere there's an Internet connection - providing increased flexibility and time savings. And you can be sure your information is safe because IconCMO+ automatically backs up your data and secures it as it travels over the Internet using the same 256-bit encryption that banks use.

IconCMO+; Instant, Accurate, and Secure... The Ultimate Management Solution for Your Organization and its churches.
