Accounting
## information at your fingertips.

ICON CMO+
systems

With IconCMO+ for the organization and IconCMO for its churches, you have the most powerful and affordable software solution available.

A true fund accounting system is included with IconCMO. This means that the organization's main office as well as its churches, has access to an accounting system that has been reviewed by a major CPA firm for suitability of use. IconCMO passed their requirements for meeting FASB standards established for proper financial reporting by churches.

No more waiting for quarterly or annual reports from each of the churches within the network. With IconCMO+ you'll have up-to-the-minute financial data for each church or the entire organization in simple and easy to read tables and graphs.

Avoid duplication. Because a single IconCMO database is used by the entire organization, there is no need to maintain multiple systems. This improves accuracy and reduces cost as everyone is working with the same information.

Work from anywhere. Because IconCMO+ is web-based, it can be used anywhere there's an Internet connection - providing increased flexibility and time savings. And you can be sure your information is safe because IconCMO+ automatically backs up your data and secures it as it travels over the Internet using the same 256-bit encryption that banks use.

IconCMO+; Instant, Accurate, and Secure... The Ultimate Management Solution for Your Organization and its churches.
